

2024 IFEA WEBINAR SERIES

IFEA Webinar on Demand

Choosing the Right Screening Systems and Why It Matters

Joshua Field

Founder

SecurEvent Solutions

Fort Lauderdale, Florida

In this webinar we will explore the latest in weapon detection/ guest screening systems designed to help keep events, weapon free. Providing an impartial overview of the newest technologies on the market, exploring deployment capabilities and learning lessons from real life deployments of each technology. In addition to reviewing the technologies, we will discuss additional considerations (besides price) when it comes to selecting the right technology for your event. This webinar is designed to give Event Producers, Planners and Security Managers information about weapons detection systems, without a company sales pitch!

Joshua Field has spent the last 11 years working with teams in the NFL, MLB, MLS, NBA, NCAA, and private sector businesses, providing subject matter expertise in security staffing, training, policy development and event security operations. His active leadership at large scale national events such as Formula 1 Miami Grand Prix, Super Bowls, NCAA Final Fours, and some of the nation's largest music festivals, has showcased his specialized experience in security program development and management under a national spotlight.

In addition to his professional experience, Joshua has advanced his career skill set through numerous FEMA, TEAM and NIMS trainings, classes, and certifications. Recently Joshua became a Certified Sport Security Professional by the National Center for Sports Safety and Security. He is an authored contributor to multiple industry best practice guides and performed as a project manager & consultant for over a dozen organizations' SAFETY Act Application. Bringing his years of experience working at special events, across the nation, Joshua founded SecurEvent Solutions with one goal in mind MAKE ALL EVENTS SAFER!
