

Outdoor Amusement Business Association, Inc.

Help Save America's Small Business H-2B Workers are Critical to America's Agricultural Fairs

For all of our members who utilize the H-2B temporary worker program or our friends in the fair and festival community, now is an urgent time for you to take immediate action.

It is imperative that you reach out by phone or in face to face meetings with your Representative in the U.S. House or your U.S Senator to ask for their active support. In the midst of trying to find solutions to ongoing concerns about the ways DHS and DOL have operated this program to the potential detriment of the foreign workers who so urgently depend upon it to support their families and the vitality of our industry, recent developments have compounded the problems we all face.

Attached is a document you can share with your elected officials once you have contacted them. It briefly tells them about our situation and suggests ways they can help. We urge to immediately contact the Washington office of your members of Congress. If you know them personally, ask to talk to them or their Chief of Staff. Otherwise ask to speak to the Legislative Assistant who handles labor and /or immigration issues. Another option is to locate their field office in the district nearest you and call or meet with the District Director.
